

What's the Good News??

April 2012

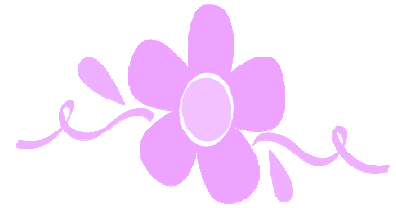

MARK your calendars!!!!

Yellow Days ~ April 18th and 19th.

Beach Days ~ Tuesday May 15th and Wednesday 16th

Pre-K(4s) Graduation ~ Thursday, May 31st beginning at 5p.m.

April will be busy for Good News Preschool! Our units will be Dinosaurs and Insects. The letters for the month are Vv, Ww, Xx. The numbers are 17, 18 and star is our shape. We will experiment with an erupting volcano, tar pits and dinosaur nests with hatching dinosaur eggs!!! Can that be?

As we move into our insect unit, we will study the life cycle of the butterfly from egg to butterfly. We will witness the transformation as the eggs hatch and grow into caterpillars and build their chrysalises and burst into the world as beautiful butterflies!!! We will practice graphing by sorting and discussing our favorite butterflies.

Songs you may hear include: "There Will be Flowers in the Garden in the Spring", "Sing a Song of Sunshine", "Dino Pokey", and "1-2-3 Triceratops". We will practice "Swamp Jumping" and fine tune our positioning skills with dinosaurs on a stick! Rhythm will be another focus of our movement activities as we use our hands for clapping, our feet for stomping and musical instruments to listen and repeat rhythmic patterns.

Work continues on the butterfly garden. Once the soil is prepared, we will plant, water and watch God's work!!

Evaluations will begin in early May.
